BOUNCING BACK TO LEARNING AT SCHOOL

Planning is underway to support learners in Kindergarten to Year 2 to ‘bounce back’ to learning at school.

The focus in Term 2 for our youngest learners will be on universal support, and checking-in with parents about their children’s learning.

Term 3 will progress to more targeted supports with a focus on wellbeing and literacy and numeracy development.

**Student wellbeing** - Noticing how children are functioning, feeling and being. Students re-establishing social connections and interactions with peers

**Student learning** - Based on information from parents and ongoing observations and knowledge of students, teachers will explicitly plan for and provide opportunities for development in all learning areas.

**Family partnerships** - Building on the positive family connections to provide a successful transition from learning at home to learning at school. Providing two way conversations and communication with parents to gain knowledge about the learning at home experience, their child’s strengths, interests and wellbeing social, physical and cognitive development.
