Risdon Vale Primary School – Nutrition Food and Agriculture

Risdon Vale Primary School are partnering with their local Neighbourhood Centre to develop a large amount of unused land enclosed on the school. They are creating a large scale ‘Risdon Vale Fresh Food Community Co-op’ to incorporate a monthly Farmers Market with sales to community members, greater Hobart and local restaurants and independent supermarkets. permaculture experts and students at that course will use the school as a live, real case study to advise and develop a plan for the large scale garden.

They have recently re-located and installed new play equipment and are working with the Clarence Council to install a 40 foot shipping container. This will be used for kitchen garden storage, and the front will have a small verandah that will be used an outdoor learning centre for students.
