

# GEOGRAPHY Level 3

## Common Assessment Task

### Work Requirements:

N/A

### Assessment Type:

Extended responses

### Criteria being assessed:

- Criterion 4
- Criterion 5

### Suggested conditions:

- This task should take learners 60 minutes.
- There are 2 questions.
- The response to each question should be between 250 and 375 words.
- The task may be word-processed or hand-written.
- This task should be completed individually.

---

### Task Description:

You will write extended responses to 2 questions.

- You have 15 minutes to organise your thoughts and plan your responses.
- Use the remaining 45 minutes to write the two responses.
- Include 5 minutes to check your essay for obvious errors and to make sure you have included the information you wanted to.

### What you need to do:

Write an extended response (between 250 and 375 words) for each question.

1. Explain the key causes of anthropogenic climate change and discuss important ways in which this process is contributing to land cover change across the world.
  - refer to at least one More Developed Country and one Less Developed Country in your answer.
2. For one country, identify and describe one form of human activity that is creating land cover change. Describe the important social and environmental impacts of this process.
