

Phase 4 Consultation

Tranche IA – Key messages for Principals

How do I know what is going to be available for our scope in 2022 and 2023?

Subject to accreditation, Tranche IA is intended to be available from 2022 and Tranche IB courses are intended to be available from 2023. An overview of Tranche IA and IB courses is available. Updated Course Provision documents for future tranches are intended to be available in Term 3.

How can I get a summary of key information about the Tranche IA courses?

There is now a Tranche IA summary document which contains information about the Course Description and Rationale for each course as well as some additional context for providers.

What happened to the feedback our school provided in Phase 3?

Courses have been updated based on both the feedback received from schools and recently released Office of TASC policy documents relating to accreditation as well as the TASC Health Check.

A number of general updates have been made to courses which can be found detailed in the Phase 3 consultation feedback summary. Course specific feedback can be found in the individual Course Consultation reports. TASC policies can be found on the TASC website.

How do I support my teachers to provide Phase 4 Feedback?

You can share with your staff the Phase 4 What I need to Know Video. Where possible, please support staff to attend online Consultation Support sessions and encourage your staff to provide feedback on Phase 4 Courses.

What happens after my teachers submit Phase 4 feedback?

Any final updates in-line with feedback received, TASC Health Checks and TASC policy documentation will be made prior to submitting courses to the Accreditation Advisory Group and the Office of TASC for accreditation. We will publish a Phase 4 Consultation report outlining any further changes made as a result of feedback, prior to accreditation submission, on the I1 and I2 website.

Further information about resources and professional learning to support implementation of courses will be available on the I1 and I2 website soon.

What's happening with Tranche IB?

Tranche IB courses will shortly be undergoing the TASC Health Check processes as part of the Senior Secondary Accreditation Framework, and amendments made in light of feedback received through Phase 3 consultation. Phase 4 consultation is intended to take place between August 9 and 27. This is timed to avoid clashing with major reporting periods.

What's happening with the courses due to expire at the end of 2021?

Years 9 to 12 Learning have requested that the Office of TASC renew all currently available accredited courses until at least 2022 (with the exception of Engineering Design EDN215118 and Community Access CAC I10117 which are intended to be replaced by *Engineering Design* and *Civics and Citizenship*).
